Client	Planning and Land Resources Bureau of Binhai New District, Tianjin
Scale	12.7 sqkm
Collaborator	Kragh & Berglund Landscape (Copenhagen/Beijing)
Time	2011
Status	Competition 2 <sup>nd</sup> Prize

This project, located at the coast of Bohai Sea, is still an ocean on the planning blueprint. The development vision of the client is the only way to balance the lack of cultural and historical background. The romantic garden city and the unique shape of jellyfish give us inspiration on our design. The green center of the City Garden contrasts with the Esplanade along the circular coastline. The great combination of Blue and Green forms a five-minutes cluster, looking like the petals of the sea flower. The abandonment of grid urban layout will strengthen connection with the waterfront. The design creates opportunities and promotes the regional economic value on one hand, gives the coastal cities new characteristics on the other hand. The fresh sea air and broad seascape are the most precious gifts given by nature to the North China.
