Blue and Green Bay Engine

Eco-coast: we recommend using an eco-oriented urban development model, to protect and restore the ecological environment of the coastline area and to provide a place for the harmonious development between man and nature through environmentally friendly landscape design.

Vibrant Coast: The West Coast Economic Zone will become a new destination for city clusters of Qingdao, Weifang and Rizhao. The vibrant coast will become a catalyst for the development of surrounding areas and the central axis of regional social development.

Charming Coast: By Integrating the coastal resources, we guide the city to use the coastline rationally and orderly, to achieve the harmonious coexistence and mutual promotion of people, cities and nature, and to create the charming coastline.
